UCM Wi-Fi How-To

To connect to the UCMO-WiFi network on your computer, just follow these simple steps.

First, locate your "Available Networks" by clicking on the WiFi signal icon. Second, look for UCMO-WiFi and select it. When prompted, enter your Network ID and Password.
Remember: *It is the same ID and password you use for Blackboard, logging into campus computers, and accessing your UCM email.*

If you ever need to recover your Network ID, reset your password, or add a personal email to MyCentral, no worries!
For detailed instructions, just head over to our Single-Sign-On website.

   https://www.ucmo.edu/offices/office-of-technology/single-sign-on/index.php

Bonus Wi-Fi Info

Don't forget, if you want to connect to UCMO-WiFi on your mobile device, make sure your device has the following settings:
<div align="center">

EAP Method = PEAP
Phase 2 Authentication = MSCHAPV2
Certificate = Automatically Select
</div>

Additionally, you will need to turn off the "Mac address randomization" in your phone's settings if your phone has this option turned on.

Student Managed Devices: On UCMO-GUEST Wi-Fi

IMPORTANT: PLEASE READ BEFORE ATTEMPTING TO CONNECT YOUR DEVICES!

Be sure and do not try to connect your device to the ***UCMO- Wi-Fi network first***! Use the directions on the following website to connect to the UCMO-GUEST Wi-Fi instead.

This site will allow students to manually enter their wireless MAC addresses for those devices that cannot connect to the UCMO-WiFi (e.g. older model game consoles and smart TVs).

   https://student.devices.ucmo.edu

Students are allowed a maximum of 10 devices connected at one time.

Important Note: All Student entries are valid for one school year. They will be deleted at the end of each spring semester.

Feel free to reach out to us if you have any questions. The Technology Support Center (TSC) is on the Lower Level of the *Ward Edwards Building room 0200* or by calling *660.543.4357*.

 Happy connecting!
