Draw on your passions.

Are you interested in a construction, engineering, or manufacturing design career? How does a job in an architecture or interior design firm sound? A CADD minor is a good fit if you like to draw and create with a computer.

UCM's CADD minor is an 18-hour program that will provide you with the in-demand skills that design and drafting professionals in architecture, engineering, manufacturing, and nearly every industry are looking for from college graduates. You'll hone your technical and creative skills with the opportunity to gain experience in:

- Architectural design/drafting
- Building information modeling (BIM)
- CADD design
- Civil / geodatabase (geographic information systems - GIS) mapping
- Mechanical/electrical/plumbing (MEP) design
- Structural design and detailing
- 3D modeling and printing
- Construction drawing

**Minor in CADD and draft your path
to a fulfilling and lucrative career.**

Online classes are available.
