Robert Crane is the homeland security advisor to the National Coordination Office for the U.S. Policy on Space-Based Positioning, Navigation and Timing (WWW.GPS.GOV) in Washington, D.C. Since joining the Department of Homeland Security in 2005, Mr. Crane is responsible for coordinating and aligning national policy on space, the Global Positioning System (GPS), and its augmentations with the geospatial intelligence, information sharing, infrastructure protection, space, cyber, and resilience strategies of the Department. Previous assignments include deputy director of the national security systems program, advisor to the U. S. Coast Guard and the DHS on the maritime information sharing environment, and Commander in the Coast Guard Reserve, holding a number of active duty positions in maritime homeland defense, contingency and readiness planning, and workforce management prior to his retirement in 2004. He has private sector experience in financial services, oil & gas, agriculture, and transportation sectors. Mr. Crane holds a B.S., a M.B.A., business continuity credentials through the Disaster Recovery Institute International, and membership in the International Association of Emergency Managers and the Association of Contingency Planners. Since 2007, Mr. Crane has been an adjunct professor in business continuity, crisis management, and critical infrastructure resilience studies with the University of Central Missouri.
