Enabling the SoftChalk Building Block in Blackboard

The SoftChalk building block allows you to easily publish SoftChalk lessons from the SoftChalk desktop application directly to Blackboard. We have the building block installed on Blackboard, but you will need to activate it to use it. One the building block is enabled, you will need to use it to generate a personal access code that is then entered into the SoftChalk desktop application. You will need to generate and enter an access code for each computer you have SoftChalk installed on.

1. Select **Tool Availability** from the Customization area of the **Control Panel** of any course you are an instructor in.

- 2. Check the box in the Available column for the SoftChalk publish tool. Note: The name of the tool listed will vary with SoftChalk versions, but the name will include SoftChalk Publish and ScoreCenter.
- 3. Click **Submit**.

- 4. Select Control Panel > Course Tools > SoftChalk Publish with ScoreCenter.
- 5. Click the **Submit** button on the SoftChalk Access Code Configuration screen.
- 6. Copy the access code listed for entry in the SoftChalk desktop application.

- 7. Open the SoftChalk desktop application.
- 8. Click File > Manage Publish Accounts
