

Accounts, Passwords, and Network Connectivity at UCM

Account requests

To request, renew, or change access for faculty, staff, adjunct instructors, temporary staff, student workers or graduate assistants, complete the [Computer Account Request](#) form.

For a contracted, non-UCM employee, the [External User Agreement](#) needs to be read, completed and returned before account access can be considered and/or granted.

Passwords & ID's for Employees

MyCentral

At the [MyCentral login screen](#), use your Employee ID (also known as a 700#) on the first line.

On the second line, use your MyCentral password. You should have received this password during your New Employee Orientation session. If you did not, please call the TSC at 660.543.4357.

Network ID

Your Network ID is used to log into campus computers, UCM email, Blackboard, and UCMO WiFi.

Your Network ID is generally your last name, or your first initial(s) plus your last name. It should look something like this: doe, jdoe, or jndoe.

Upon employment, your Network ID and email were created and sent to your supervisor, who should provide them to you. Please come by the Office of Technology in WDE 0800 to obtain and set your password.

Changing Your Password

You may change your password by visiting our [Personal Account Manager](#) page. This will change your password for the network id and your email. (Note: This page is only accessible from on-campus. If you need assistance with your Network ID and password, please contact the Technology Support Center at 660-543-4357.)

Email

Google powers email at UCM. To login, visit [UCM email](#), and enter your UCM email address. That email address will be your Network ID, followed by @ucmo.edu. It should look something like this: doe@ucmo.edu.
