ABOUT THE BUSINESS ADMINISTRATION MANAGEMENT PROGRAM
The Department of Management at the University of Central Missouri offers a Bachelor of Science in Business Administration degree program with a major in management. This major does not require a minor.

ACCREDITATION
The BSBA degree program is accredited by the AACSB International—The Association to Advance Collegiate Schools of Business.

ABOUT THE DEPARTMENT
The Management Department is a student-focused organization providing collaborative, experiential, and active learning environments to develop future managers and leaders.

ABOUT THE PROGRAM
Students must complete general education courses or have completed an Associate of Arts degree at an accredited community college before starting at UCM Summit Center. In addition, the necessary prerequisite courses are:

- College Algebra
- Microeconomics
- Macroeconomics
- Accounting I and II
- Computer-Based Technology
- Business Statistics
- Business Law

You may be able to start the program if one or two of the courses above are completed concurrently with the first two semesters of the program at UCM Summit Center. It will require two nights a week for eight consecutive semesters at UCM Summit Center to complete the last 16 courses. Most courses are experiential, interactive, and team-based.

INTEGRATIVE BUSINESS EXPERIENCE
The foundation project for all management majors in the Harmon College of Business is the Integrative Business Experience (IBE), which students at the UCM Summit Center must take during their first two semesters. IBE students start a company, launch a product, and make a profit to help a nonprofit organization of their choice. They also select a community service project. The IBE experience uses an experiential team-based approach as do nearly all classes in the program.
